Subject index

Abscess scintigraphy 99m-Tc leukocytes 302
acetyl-ruthenocene (103-Ru) in adrenal glands 56
acylplasmins, 99m-Tc, thrombus detection 155
adrenal gland affinity of acetyl-ruthenocene (103-Ru) 56
aerosol ventilation imaging 417
aerosol, dry, of 99m-Tc millimicrospheres vent. studies 411
alpha-Aminoisobutyric acid (1-11-C) in canine tumors 48
– – (AIB) in melanoma 45
amplitude distribution, right ventricle 75
aneurysm underestimation of ejection fraction 338
angioscintigraphy, first pass in thoracopagos twins 84
antipyrine (18-F-fluoro) biodistribution 278
arthrography-radiocontrast and radionuclide 531
asthma bronchial ventilation perfusion studies 81
Au-198 synovectomy of the knee 446
autoradiography 133-Xe bladder permeability 369
autoradiography, whole body acetyl-ruthenocene (103-Ru) 56

Bladder permeability of 133-Xe, autoradiography 369
bone scan, increased transverse process uptake 88
– scans in vibrating disease 143
– uptake 99m-Tc-methylenediphosphonate 63
Br-82 contamination in 99m-Tc-generator eluate 60
brain tumors 11-C-L- and D-methionine uptake 373
breath test, C-13, C-14-methacetin, pregnancy, children 129

C-11 butanol tumor perfusion imaging 540
– DG, cerebral metabolism, PET studies 481
– labelled AIB in melanoma localization 45
– radiopharmaceuticals, melanoma localization 392
C-11-alpha-aminoisobutyric acid in canine tumors 48
C-11-2-DG, cerebral metabolism, PET studies 481
C-11-L- and D-methionine, brain tumor uptake 373
C-13-methacetin breath test, pregnancy, children 129
C-14 labelled AIB in melanoma localization 45
C-14-chlorpromazine in vitro uptake, mouse tumor cell 366
C-14-methacetin breath test, pregnancy, children 129
CEA (202 antibody) 131-I or 111-In-labelled distribution 398
– antibody, immunoscintigraphy 464
cardiac blood pool emission tomography 332
– transplantation rejection detection, 201-Tl 103
– transplantation, 201-Tl uptake 203
cardiomyopathy metabolism of I-123-hexadecanoic acid 222
cerebral circulation time, 99m-Tc bolus 426
chlorpromazine 11-C, melanoma localization, hamsters 392
clearance determination without blood sampling 1
clerance, renal of ruppuran 138
CO11 blood volume determination 17
cold Lesion in bone scan, osteolytic metastasis 470
colloid, radiopharmaceutical flocculation 353
computer methods overview, left ventricular function 97
congestive heart failure lung water 17
cytotoxicity of lymphocyte labelling, 111-In oxine 148

DTPA-99m-Tc scanning in kidney grafts 313

Erythrocytes 99m-Tc-labelled in hepatic haemangioma
European PET workshop 1984 93
– workshop postgraduate training 1984 185
expiratory gas flow, 81m-Kr, mathematical model 321
extraosseous accumulation, 99m-Tc-MDP 566
– tumor accumulation of 99m-Tc-MDP 362
extravascular water, 15-O 77

F-18 fluoroantipyrine biodistribution 278
– pyrimidines in tumor rats 39
F-18-FDG myocardial metabolism in rats 341
FDG 18-F-labelled myocardial glucose metabolism 341
Fe-59 citrate placenta embryo tumor uptake 288
first pass angiography in children 422
flunitrazepam 11-C, melanoma localization, hamsters 392
fluoroantipyrine 18-F biodistribution 278
fourier analysis in left ventricular function studies 500
– – in radionuclide ventriculography 198

Ga-67 membrane binding, heparan sulfate involvement 535
– placenta embryo tumor uptake 288
– tumor, liver uptake models 262
– uptake, disappearing with time 379
– in pyogenic liver abscess 123
– in vitro binding, rat liver cell 29
– – uptake, mouse tumor cell 366
GFR measuements with 99m-Tc-DTPA 519
gastroesophageal reflux 99m-Tc-HIDA scintigraphy 549
gastrointestinal bleeding 99m-Tc-erythrocytes potential pitfall 178
– motility, 11-In resin standard meal 283
– –, drug induced changes 283
gated blood pool emission tomography 332
– – – studies, Wiener filter 458
granulocyte 111-In scintigraphy in focal leucemia 557
granulocytes 111-In-oxine-labelled in *Yersinia* infections 377

H-3-deoxythymidine tumor rats 39
HCAT, 75-Se labelled, absorption test 455
heparan sulfate involvement in 67-Ga membrane binding 535
hepatobiliary scintigraphy, common bile duct 563
– study, false negative in acute cholecystitis 167
– agent – 99m-Tc-p-butyl-IDA 437
heptadecanoic acid, 123-I, 131-I, myocardial elimination 118
hippuran-131 clearance without biood sampling 1
hyperparathyroidism, adenoma localization 403
hypothyroidism in 131-I treated thyrotoxicosis 450

I-123 heptadecanoic acid, myocardial elimination 118
– hexadecanoic acid myocardial deiodination 505
I-123-hexadecanoic acid in cardiomyopathy 222
I-123-monoclonal thyroglob. AB thyroid tumor detection 291
I-123-pentadecanoic acid in myocard. and noncardiac tiss 228
I-124 human thyroid imaging 472
I-125 peanut lectin (PNA) in TA3/Ha carcinoma 68
I-125-hippuran-103-Ru-ruppuran, renal clearance 138
I-125-metaraminol platelet specific label 269
I-131 BA-1 and 202 monoclonal antibodies biodistribution 398
– capsules uptake kinetics 25
– heptadecanoic acid, myocardial elimination 118
– treatment in thyrotoxicosis 450
immunoscintigraphy 111-In 791T/36 monoclonal AB 296
– and ultrasonography complementary 464
In-111 791T/36 monoclonal AB, tumor detection 296
– BA-1 and 202 monoclonal antibodies distribution 398
– granulocyte scintigraphy, focal blast cells 557
– granulocytes in yersinia infections 377
– leucocyte imaging in pyrexia 172
– lymphocyte labelling, cytotoxicity 148
– oxine labelled platelets in vascular grafts 160
– platelets, quantification of in vivo kinetics 522

– –, scanning deep vein thrombosis 432
In-111-labelled resin meal in GI motility 283
In-111-lymphyocytes in kidney graft rejection 308
In-111-oxine labelling of thrombocytes, aseptic 477
– leukocytes, cell-bound contaminants 304
In 114m source, 81m-Kr elution parameters 33
inflammatory bowel disease, SeHCAT retention 528
inhalation method, 133-Xe, liver blood flow measurements 123

Juxtaglomerular cell tumor, scintigraphic localization 382

Ketanserin 11-C, melanoma localization, hamsters 392
kidney graft rejection, 111-In-leukocytes 308
– – studies, source of error 469
– grafts 99m-Tc-scanning 313
Kr-81m generators, elution parameters 33
– mean expiratory gas flow 321
– ventilation factor analysis 511
– – perfusion studies 81
– – in lung disease 165
Kupffer cell function – 99m-Tc millimicrospheres 358

Leucocytes 111-In labelled imaging in pyrexia 172
leukemia, T-cell metastatic calcification 90
leukocytes 99m-Tc abscess scintigraphy 302
leukocytes-labelling, 111-In, cell-bound contaminants 304
liver abscess 67-Ga scintigraphy 123
– blood flow, 133-Xe inhalation method 125
– cell binding in vitro, 67-Ga 29
– metastases 99m-Tc-DPD uptake 467
– scan in situs invertus 175
– scintigraphy Sn-colloid radiopharm. flocculation 353
– uptake after 99m-Tc-MAA venography 183
– and tumor uptake models, Ga-67 262
lung uptake of colloid 13
– water regional quantitative determination 17
lymphatic vessel grafts, lymphkinetics 349
lymphocytes 111-In-labelled kidney graft rejection 308
– In-oxine labelling, cytotoxicity 148
lymphoscintigraphy in edema of extremity 560

MDP 99m-Tc uptake in metastatic calcification 90
MDP-99m-Tc bone scans in vibrating disease 143
MQNB 11-C, melanoma localization, hamsters 392
mean transit time 77
Meckel's scan false positive 462
melanoma radionuclide imaging 392
melanoma, polychemotherapy, spermidine levels 276
metaraminol 125-I platelet specific label 269
methacetin 14-C, 13-C breath test, pregnancy, children 129
methionine 11-C, melanoma localization, hamsters 392
– L- and D-isomeres, 11-C labelled, uptake 373
methylenedisphosphonate 99m-Tc uptake parameters 63
millimicrospheres 99m-Tc dry aerosol ventilation studies 411
millimicrospheres, measurement of Kupffer cell function 358
monoclonal 791T/36 AB in tumor detection 296
– antibodies, BA-1 and 202 biodistribution 398
– thyroglobulin AB in tumor detection 291
monocytes, 99m-Tc labelled, walker carcinoma visualisation 152
mouse sarcome in vitro uptake 67-Ga and 14-C-CPZ 366
myocardial deiodination of iodo fatty acids 505
– function, radionuclide ventriculography 214
– infarction, 99m-Tc pyrophosphate, SPECT 489
– metabolism of 18-F FDG in rats 341
– scan, defect in LBBB 169
– scintigraphy, planar and tomographic 241

Neonatal hypothyroidism in twins 346
nuclear cardiology, standardization 478
– medicine imaging devices, WHO-inter-laboratory study 193

O15 H2 lung water determination 17
O-15 inhalation intravasc. signal correct. using C-15-O 387
– water determinations gradient effects 77
oxygen extraction fraction, overestimation 387

PET european workshop 1984 93
PMT-99m-Tc concentration in hepatoma metastases 255
paediatrics first pass LVEF measurements 422
pancreatic carcinoma, splenic defect in colloid scint. 554
parametric scanning for uteroplacental blood flow 286
parathyroid adenoma localization, 99m-Tc, 201-Tl 403
peanut lectin (PNA) 125-I in carcinoma 68
pentadecanoic-15 acid I-123, myocardial and noncardiac tissues 228
phosphomycin 99m-Tc, kidney visualization 134
placenta embryo tumor uptake 67-Ga, 59-Fe-citrate 288
placental blood flow, parametric scanning 186
plasmin 99m-Tc labelled in thrombosis 10
platelet labelling with 125-I-metaraminol 269
platelets 111-In labelled in vascular grafts 160
platelets 111-In labelled, deep vein thrombosis 432
platelets 111-In-labelled, quantification of kinetics 522
polychemotherapy in melanoma, spermidine levels 276
polytetrafluoroethylene vascular grafts, label. platelets 160
positron emission tomography 77
– – tomography, 11-C-2-DG, 11-C DG metabolism 481
– tomography of thyroid, 124-I 472
positron-emission-tomography, 11-C-methionine uptake 373
–, 15-O inhalation method 387
provocation test, 81m-Kr lung scans 81
pulmonary embolism, particle perfusion aerosol ventilation 417
pyrexia, 111-In leucocyte imaging 172
pyrophosphate 99m-Tc, SPECT in myocardial infarction 489

Quality control, 99m-Tc human albumin kits 551

Radionuclide angiography, stroke volume determination 208
– –, ventricular volumes 111
– ventriculography in aneurysm 338
– ventriculography, computerized analysis 198
– –, myocardial function 214
radiopharmaceutical flocculation of Sn-colloid 353
red cells 99m-Tc labelled ventricular mixing 5
regional lung water and blood volume, quantitative detection 17
renal gammagraphy, 99m-Tc-phosphomycin 134
– scintigraphy localizing juxtaglomerular cell tumor 382
– uptake of colloid 13
rheumatoid arthritis, 90-Y synovectomy 441
rubidium isotopic activities 33
ruthenocenoyl-glycine (ruppuran) clearance 138
Ru-103 ruppuran, renal clearance 138
Ru-103-acetyl-ruthenocene in adrenal glands 56

Se-75 HCAT, absorption test 455
SPECT blood pool tomography 332
SPECT, myocardial infarction, 99m-Tc pyrophosphate 489
situs invertus, 99m-Tc-Sn colloid scan 175
Sn-N-pyridoxyl-5-methyltryptophan, 99m-Tc 255
spermidine RIA, levels in melanoma, polychemotherapy 276
splenic rotation, 99m-Tc sulphur colloid scan 259
subdural haemadoma, 99m-Tc imaging 487
sulphur colloid 99m-Tc, lung and renal uptake 13
synovectomy of the knee, 90-Y 441

Task group "kardiovaskuläre nuklearmedizin" 478
Tc-99m bolus, cerebral circulation time 426
– bone scan, osteolytic metastasis – cold lesion 470
– false positive Meckel's scan 462
– HIDA in gastroesophageal reflux 549
– human albumin kits, quality control 551
– labelled erythrocytes in hepatic haemangioma 178

– leukocytes abscess scintigraphy 302
– methylenediphosphonate uptake parameters 63
– millimicrospheres – Kupffer cell function 358
– millimicrospheres dry aerosol ventilation studies 411
– particle perfusion/aerosol ventilation 417
– plasmin test in thrombosis 10
– pyrophosphate, SPECT in myocardial infarction 489
– red cells ventricular mixing 5
– renography – renal perfusion in liver disease 317
– subdural haematoma scintigraphy 487
– sulfur colloid, splenic defect 554
– sulphur colloid scan, splenic rotation 259
– – colloid, lung and renal uptake 13
Tc-99m-201-Tl substraction scintigraphy 403
Tc-99m-acylplasmins, thrombus detection 155
Tc-99m-DPD liver uptake in metastases 467
Tc-99m-DTPA GFR-measurements method comparison 519
– scintigraphy in kidney grafts 313
Tc-99m-generator eluate, 82-Br contamination 60
Tc-99m-labelled monocytes, walker carcinoma visualisation 152
Tc-99m-MAA perfusion in lung disease 165
– venogram – liver visualization 183
Tc-99m-MDP bone scans in vibrating disease 143
– extraosseous accumulation 566
– – tumor accumulation 362
– uptake in metastatic calcification 90
Tc-99m-p-butyl-IDA plasma transport 437
Tc-99m-phosphomycin, kidney visualization 134
Tc-99m-Sn-colloid, scan in situs invertus 175
–, arthrography in arthroplasty 531
Tc-99m-Sn-N-pyridoxyl-5-methyltryptophan, hepatoma metastasis 255
Tc-99m-Sn-sulphur colloid lymphkinetics, lymphatic graft 349
temporal filtering with Wiener filter 458
thrombosis 99m-Tc plasmin test 10
thrombosis, deep vein, 111-In platelets 432
thrombus detection, 99m-Tc-acylplasmins 155
thyroglobulin monoclonal AB in tumor detection 291
– in thyroid cancer on suppression therapy 252
thyroglossal duct visualization 181
thyroid cancer, thyroglobulin during suppression therapy 252
– dysgenesis in twins, scintigraphy 346
– uptake kinetics, 131-I capsules 25
thyrotoxicosis 131-I treatment 450
Tl-201 heart scint. planar and tomographic 241
– myocardial scan defect in LBBB 169
– in cardiac transplantation 203
Tl-201-99m-Tc substraction scintigraphy 403
tumor perfusion imaging with C-11 butanol 545
– placenta embryo, 67-Ga, 59-Fe-citrate uptake 288
– and liver uptake models, 67-Ga 262
twins thoracopagus, first pass angioscintigraphy 84
thyroid imaging 124-I positron camera 472

Ultrasonography and immunoscintigraphy complementary 464

Ventilation perfusion in lung disease 165
– studies, 81m-Kr factor analysis 519
ventilation, perfusion using 81m-Kr 81
ventricle, right amplitude distribution 75
ventricular ejection fraction (left) in aneurysm 338
– – fraction, semiautomatic methods 494
ventricular function (left), first pass, children 422
– function, left, overview computer methods 97
– mixing, radionuclide determination 5
– stroke volumes, radionuclide determination 208
– volumes, left, during exercise 111
ventriculography time-activity curve 198
vibration disease, bone scanning 143

WHO inter-lab.-study of imaging devices 193
Wiener filter, temporal filtering 458
workshop 1984 postgraduate training nuclear medicine 185
– 1984, PET European 93

Xe-133 bladder permeability in mice, autoradiography 369
– inhalation method of liver blood flow measurements 125
– regional ventilation evaluation 406

Y-90 synovectomy of the knee 441 ff
Yersinia infection, 111-In-labelled granulocytes 377
